*Amendment 6*  
*Item 7*

Dear George:

25X1A

We are submitting herewith a proposal covering the establishment of a test site suitable for conduct of tests on System No. 2 in the form in which that system will be provided initially. The estimated cost of constructing the facilities required at this site is [REDACTED] this does not include the costs of erecting a navigation-antenna array which will probably be required at a somewhat later date.

The cost of engineering services required for design and initial operation of the test facility were included as an item of cost in our original proposal covering the development of System No. 2. The costs identified in the attached Exhibit A cover only those to be incurred for materials and labor necessary to erect the structures required, to transport the heavier items of equipment from our plant to the test site, and to place these in their appropriate positions within the building.

We are attaching two copies of a lease agreement covering rental of the property which has been selected for the test site. Your approval of this agreement and your authorization to allow the rental on this property as an allowable item of overhead cost is requested.

This contractor will sign the lease agreement immediately after receiving your approval of that agreement, and will proceed with erection of the facilities required immediately after receipt of authorization to expend the funds indicated in the attached proposal.

Sincerely,

25X1A

[REDACTED]
